Full automatic dispenser YS-D331-2

Application

The Glue robot widely used in the industrial production field, such as PCB Board, speaker, MP3, MP4, LCD Display, integrated circuits, printed circuit boards, electronic components, automotive parts, handbag, packing box etc.

Glue robot is suitable glue: UV glue, Silicone, epoxy, red glue, AB glue, COB black glue, Conductive adhesive and so on.

Features:

1. English touch panel, easy operation.
2. Glue Dispenser Function: Drawing point, line, surface, arc, circle, irregular curve continuous complement and triaxial linkage.

3. Can set glue size, glue speed, dispensing time, stopping glue time. Stable glue exudation without glue leaking and dripping.
4. The dispensing head set the micro touch switch, convenient operation; no air pressure, power can work.
5. Precise stepper motor, numerical control available
6. Apply three-axis robot to control the dispensing position to ensure high precision of glue dispensing
7. According to the production process, work platform can be installed with positioning PIN, glue guns, baseboard heating temperature controlling device.
8. Have air clean device, can guarantee the material clean and dry.

Specification

1. Man-machine interface, easy to operate.
2. 3 axis movement
3. Reasonable price, high quality
4. 1 year warranty

Model	YS-D331-2
Work area(X*Y*Z)	300*300*100mm
Max. speed	500mm/sec
Resolution	0.01mm
Repeatability	±0.01mm
Operation interface	LCD touch panel/Handhold control box
Drive mode	Micro stepping motor/belt
Power	AC220V/110V 50-60HZ
Size	460*450*480mm
Net weight	70kg
Operation environment	Temperature:5-40 degrees Celsius Humidity:20-90%RH
